PSS 15.2 Standing Waves Learning Goal: To practice Problem Solving Strategy 15.2 Standing Waves In lab,

Read PDF 15 2 Practice Problems Answer Key

your instructor generates a standing wave using a thin string of length $L = 2.25$ m fixed at both ends. You are told that the standing wave is produced by the superposition of traveling and reflected waves, where the incident traveling waves propagate in the $+x$ direction with an amplitude $A = 2.75$ mm and a speed $v = 11.5$ m/s.

$x = 2$. To find the value of y , substitute 2 for x in the first equation. $y = -3(2) + 4 = -6 + 4 = -2$. Therefore, the solution of the given system of equations is $x = 2, y = -2$. Check this solution by substituting the values into the second equation and making sure the resulting equality is true. 2. A.
