maple trees and vines that includes the boxelder and its spinning "helicopter" seed pods, but have also been known to feed on fruit during dry summers.

How to Get Rid of Boxelder Bugs | Planet Natural

Merchant Grain beetles can be found all over the world and can live in cooler climates. Once confused with a kind of beetle that does eat grain, the Merchant beetle was scientifically re-categorized, but the name stuck. These beetles get their name because they were commonly found on merchant ships, hiding in organic cargo. Size: 1/10" to 1/8"

Beetles stick close to their food source, so depending on what the invading beetle species eats, you'll find them living around those food sources. For example, carpet beetles eat a wide variety of items, mostly fibrous. Ironically, they don't really live in carpets anymore, since most modern carpets are synthetic (though they will if the ...
