Example: Software Architecture Document

Application Technology Architecture Application Providers have Technology Architectures that describe the technology that is required and how that technology is provided. This tutorial describes how the Technology Architecture of an application is captured in Essential Architecture Manager.

Application Technology Architecture - Essential Project ...

A software architecture document is a map of the software. We use it to see, at a glance, how the software is structured. It helps you understand the software's modules and components without digging into the code. It's a tool to communicate with others—developers and non-developers—about the software. For example, a three-tier application architecture looks like this:

Software Architecture Document? Do You Need One? - NDepend
