calculate the mean, we just add up all 7 values, and divide by 7. In fancy statistical notation, $\frac{1}{7} \sum_{i=1}^7 x_i = \frac{10.2 + 7 + 12.0 + 9.5 + 13.5 + 7.2 + 10.5}{7} = 10.2$ years.

b. To calculate the sample median, first rank the values from lowest to highest: 6.3 7.2 9.5 10.5 12.0 12.5 13.5

PRACTICE

PROBLEMS

Below is a quick tutorial followed by practice questions.

Mean Mean is the most common form of average used. To calculate mean, you simply add up all the values of data given and divide by the number data provided.

Example Find the mean of 8, 5, 7, 10, 15, 21

Sum of values = $8 + 5 + 7 + 10 + 15 + 21 =$

Mode

mode of a set of numbers is the number or numbers that repeat the most frequently. In the set of numbers $\{3, 4, 3, 4, 4, 5, 12\}$, our mode is 4. Even though the number 3 occurred twice, the number 4 occurred three times and is thus our most frequently appearing number.
