Clojure for Domain-specific Languages. (eBook, 2013 ...

The answer is Domain Specific Languages. And Clojure excels at them. Lisps have traditionally been great at writing languages in. Why? Because it was originally defined in itself. That's right: Lisp was designed to be written in itself. That means from day one, you could use it, with no dependencies, to write languages in.

Domain Specific Languages in Clojure - Video Course ...

One of the core strengths of any Lisp, Clojure included, is their support for domain-specific languages (DSL). Writing a DSL in Clojure is a natural and low ceremony design technique. Perhaps that's the reason why the existing literature has been sparse on the subject; there's not really anything special about the mechanisms behind a Clojure DSL.
