Despite the lack of any agreed upon theory of consciousness, there is a widespread, if less than universal, consensus that an adequate account of mind requires a clear understanding of it and its place in nature. We need to understand both what consciousness is and how it relates to other, nonconscious, aspects of reality. 1. History of the issue

Consciousness (Stanford Encyclopedia of Philosophy)

We've assumed that physical reality is the ground state and consciousness is the phenomenon, but reality could just as easily be a dream in the mind of the universe. If consciousness can influence reality that would seem to indicate it is either equally fundamental to, or even precedent over material reality.
