Sustainable Development. national low-carbon strategy (SNBC) The national low-carbon strategy (SNBC), established by the Energy Transition Act, defines how to reduce greenhouse gas (GHG) emissions at the national level. It orchestrates the implementation of the transition towards a low-carbon economy. [2015] Sustainable Development

Sustainable Development | Gouvernement.fr

Sustainable Development is the organizing principle for meeting human development goals while simultaneously sustaining the ability of natural systems to provide the natural resources and ecosystem services on which the economy and society depends. The desired result is a state of society where living conditions and resources are used to continue to meet human needs without undermining the integrity and stability of the natural system.

Sustainable development - Wikipedia

Microbial interventions can also be used to clean contaminated sites from accumulated pesticides, heavy metals, polycyclic aromatic hydrocarbons, and other industrial effluents. The potential of and key processes used by microorganisms for sustainable development and environmental management are discussed in this review, followed by their future prospects.
