Chapter 4 Simple regression model Practice problems Use Chapter 4 Powerpoint question 4.1 to answer the following questions: 1. Report the Eview output for regression model . Please write down your fitted regression model. 2. Are the sign for consistent with your expectation, explain? 3.

## **Simple Regression Model Practice Problems Essay example**

Many data sets have an approximately linear relationship between variables. In these cases, we can predict one variable using a known value for another using a best-fit line, a line of the form  $y = m x + b$  that follows the trends in the data as closely as possible.. Here,  $x$  is called the predictor variable because it will be used to predict  $y$ , while  $y$  is ...
