...

The neuroscience of religion, also known as neurotheology and as spiritual neuroscience, attempts to explain religious experience and behaviour in neuroscientific terms. It is the study of correlations of neural phenomena with subjective experiences of spirituality and hypotheses to explain these phenomena.

Neuroscience of religion - Wikipedia

Consciousness Studies and Contemplative Neuroscience The study of consciousness brings a new dimension to both philosophy and psychology, so that the process of knowledge is turned back onto itself and consideration is given to the remarkable fact of awareness, of knowing, that makes knowledge possible.
