Multiplying 2 fractions: $5/6 \times 2/3$. Our mission is to provide a free, world-class education to anyone, anywhere.

Multiplying fractions (practice) | Khan Academy

Answer Key. 1. B. First rewrite the fractions with a common denominator. The least common multiple of 5 and 3 is 15, so multiply the numerator and denominator of the each fraction to make the denominators 15. Now, since the resulting fractions have a common denominator, subtract them by subtracting their numerators and put the result over 15. 2. A.
