Answer by writing the motion's description in the boxes. For example, "earth spins on its axis" or "earth orbits the sun" or "moon orbits the earth." (7 minutes)

Rotation vs. Revolution Lesson Overview

The two fundamental concepts which are studied in circular motion are rotation and revolution. While rotation means the movement in circle round an axis, revolution is when an object moves in a circular path around another object or center. Many people often misinterpret these two concepts as they think that these two are same.
