The SLC 150 series is a set of easy to program PLCs using the ladder diagram format. The PLC's capacities include relay logic, switch registers, sequencers, counters and timers. The SLC 100 series can be combined with SLC 100 series or SLC 150 series expansions to increase the I/O value up to 112. Showing 1 to 14 of 14 entries

Probably a good idea to go to the A-B site and download 1745-um001\_en-p.pdf (Publication 1745-800 User's Manual) for SLC-150 reference. If you haven't already purchased the SLC500 (or otherwise have one handy) for this retrofit, and you want to stay with Allen-Bradley I'd suggest using one of the Micrologix series PLCs instead of the SLC500.

According to the manual the desired time delay is entered in seconds using the SLC 150 software (i.e.400.0 = 400 seconds). There are also special internal timer addresses which can be used with the CTU - Up Counter in order to program counter-type timers which can have longer delays up to 9999 seconds.

It requires either a hand held programmer or a DOS based program called PCIS and a communication adaptor. PCIS is available for free and I think there are some people selling communication adaptors, including an after market model, on E-bay. If you search the forum for PCIS and SLC 100 you can find links to get the software and manuals.
